

**ASI'S PATENTED INTEGRATED PRIVACY™
METAL PARTITIONS—WHERE PRIVACY
IS ENGINEERED INTO THE DESIGN.**

**DON'T SETTLE FOR AN ADD-ON PRIVACY
STRIP AS AN AFTERTHOUGHT.**

**AT ASI, PRIVACY ISN'T OPTIONAL.
IT IS OUR STANDARD.**

**THE OLD WAY:
INDUSTRY AFTERTHOUGHT SOLUTIONS**

**NON-COLORMATCHED
PRIVACY STRIPS**

Finding add-on metal privacy strips to match your partition color is almost impossible. From raw aluminum to a color that's not an exact match, the choices are limited.

**NOT SQUARE
AND ONE WIDTH
DOESN'T FIT ALL**

Installing add-on privacy strips and getting them to be square is difficult, they also don't always fit over the gap you're trying to cover.

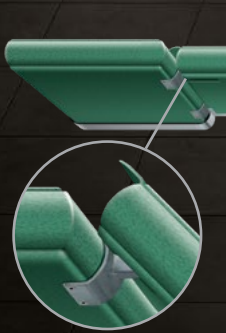

**EXPENSIVE
AND DIFFICULT
TO INSTALL**

Imagine installing add-on privacy strips one by one on a large project or having to close your restroom(s) so they can be installed. After hours installation isn't cheap either.

**THE NEW STANDARD: PATENTED
INTEGRATED PRIVACY™ SYSTEM**

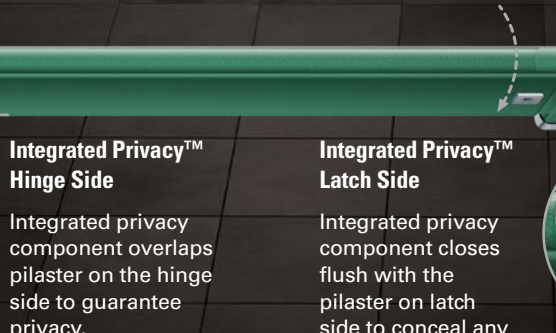

ASI's proprietary, Integrated Privacy™ metal partitions are engineered with built-in privacy and manufactured as one color matched unit, offering complete privacy without the need for any retrofitted components. Exactly what building occupants want and deserve.

HOW IT WORKS

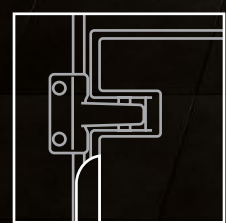

**Integrated Privacy™
Hinge Side**

Integrated privacy component overlaps pilaster on the hinge side to guarantee privacy.

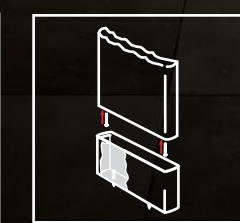

**Integrated Privacy™
Latch Side**

Integrated privacy component closes flush with the pilaster on latch side to conceal any sightlines into the compartment.

**Integrated Privacy™
(Hinge Side)**

Integrated Privacy Partitions feature unique hinges that work with the integrated system.

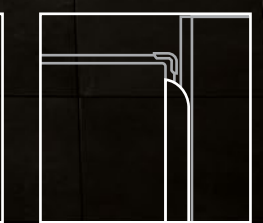

Easy-Stall™ Shoe

Type 304 Stainless Steel Easy-Stall™ Shoe simplifies installation and leveling adjustments.

**Our New Standard
Occupancy Indicator**

Our partition doors are factory drilled simplifying the installation of the occupancy indicator.

**Integrated Privacy™
(Latch Side)**

Integrated Privacy Partitions feature a Zero Sightline Component to conceal compartment.

At ASI privacy isn't an afterthought—it's our standard.

INTEGRATED PRIVACY™ SYSTEM AVAILABLE
STANDARD IN OUR STAINLESS STEEL AND
POWDER COATED STEEL PARTITIONS.

STAINLESS STEEL PARTITIONS

THE DURABILITY AND
ELEGANCE OF TYPE 304
STAINLESS STEEL
COMPLEMENTS ANY WASHROOM

ASI's stainless steel metal partitions are manufactured with Integrated Privacy™ and complement any design scheme. By adding a textured finish, increased resistance to vandalism can be achieved. Available in all four mounting styles.

POWDER COATED PARTITIONS

POWDER COATED STEEL
WITH A HONEYCOMB
CORE FOR SOLID CONSTRUCTION
AND SOUND ATTENUATION

ASI's powder coated metal partitions are manufactured with Integrated Privacy™. Thermoset hybrid powder coating on these galvanized steel partitions provide quality and economy. The finish is resistant to wear, fading, and scuffing. It is easily cleaned and wiped dry.
