

For Immediate Release:

ASI GROUP INTEGRATED PRIVACY PARTITIONS RECOGNIZED BY ARCHITECTURAL PRODUCTS PRODUCT INNOVATION AWARD (PIA)

New York – (December 13, 2023) – ASI Group, the world’s leading manufacturer of commercial toilet partitions, innovative washroom accessories, lockers, and visual display products, received an Architectural Products Product Innovation Award (PIA) for its Integrated Privacy Partitions. The annual awards program identifies several innovative solutions now available to help architects create beautiful, unique, and high-performance projects.

Cyrus Boatwalla, Director of Marketing at the ASI Group, explains, “Our built-in need for privacy is laid bare in public washrooms, most of which are designed for multiple users and simultaneous use. Today, more than ever, our need to feel safe is paramount, and this can cause public washrooms to bring out deep-rooted fears, which may manifest in a visceral response. While some people may be mildly bothered by the thought of using a public washroom, others are paralyzed by the prospect—to the point that they cannot use the washroom while others occupy it.”

Each year, the Architectural Products Product Innovation Award recognizes the latest solutions in a variety of product categories, demonstrating new possibilities in form, function, wellness, and sustainability.

About Integrated Privacy Partitions

Exclusive to the ASI Group, the industry’s first Integrated Privacy™ system for metal partitions is engineered to provide complete privacy and manufactured so that the doors are delivered with built-in privacy components, with no need for field retrofitting—ever.

The guiding principles of the design—to meet an occupant’s need for total privacy while also being more aesthetically pleasing than using retrofitted privacy components that don’t match the stall—are reflected in the innovative design. The built-in privacy components completely close the gap on the latch and hinge side of the door to guarantee zero sightlines into the stall. These components, now expertly color matched to the rest of the stall, create a sense of continuity from the partition door to the pilasters. In addition, an occupancy indicator latch is now our new standard, and an Easy-Stall™ Shoe, made of Type 304 Stainless Steel, simplifies the installation process.

With this patent-pending innovation, ASI Group once again elevates the standard for privacy in metal partitions and provides a solution that meets the demand for both old and new social boundaries.

At ASI, privacy isn’t an afterthought—it’s our standard.

**Available standard in our Stainless Steel and Powder Coated Steel partitions.
